Self-Regulating Low Temperature Heating Cable

- **Self-Regulating, Energy Efficient**
- **16 AWG Buss Wire**
- **Circuit Lengths to 660 Feet**
- **Process Temperature Maintenance to 150°F (65°C)**
- **Maximum Continuous Exposure Temperature (Power Off) 185°F (85°C)**
- **Industrial Freeze Protection Applications**
- **Freeze Protection of Fire Protection System Piping**
- **Field Splicing Without Disrupting Heat Output**
- **3, 5, 8 and 10 Watts per Foot**
- **120 and 208-277 Volts Available From Stock**
- **Approximate Size 3/8" x 1/8"**
- **Minimum Bend Radius is 1-1/8"**

Chromalox®
PRECISION HEAT AND CONTROL

Cut to Any Length in Field

Can be Single Overlapped

Low Temperature

Self Regulating

Description

Chromalox SRL self-regulating heating cable provides safe, reliable heat tracing for freeze protection of pipes, valves, tanks and similar applications. Constructed of industrial grade 16 AWG buss wire with a tinned copper braid and optional overjacketing, SRL ensures operating integrity in Div. 2 hazardous environments as well as certain corrosive industrial environments. SRL heating cable has a maximum maintenance temperature rating of 150°F (65°C).

Features

- Energy efficient, self-regulating SRL uses less energy when less heat is required.
- Easy to install, SRL can be cut to any length (up to maximum circuit length) in the field.

- Field splices can be performed easily in minutes with no scrap or wasted cold sections.
- SRL features lower installed cost than steam tracing, less maintenance expense, and less downtime.
- SRL can be single overlapped without burnout, which simplifies heat tracing of in-line process equipment such as valves, elbows and pumps.
- Because SRL is self-regulating, overtemperature conditions are virtually impossible.
- Chromalox termination, splice, tee and end seal kits reduce installation time.
- UL listed for use on fire protection System piping

SRL – Self-Regulating Low Temperature Heating Cable

Construction

Approvals

FM - Factory Mutual approved for ordinary areas.

UL Listed, CSA Certified for ordinary areas.

UL Listed for fire protection system piping

FM approved for hazardous (classified) areas when used with Chromalox accessories:

- Class I, Div. 2, Groups B, C, D (gases, vapors)
- Class II, Div. 2, Groups F, G (combustible dust)
- Class III, Div. 2 (easily ignitable fibers and filings)
- 3 Watt rated T6 temperature class
- 5 and 8 Watt rated T5 temperature class
- 10 Watt rated T4A temperature class

CSA Certified for hazardous (classified) areas when used with Chromalox accessories:

- Class I, Div. 2, Groups A, B, C, D;
- Class II, Div. 2, Groups F, G

Applications

- Process Temperature Maintenance
- Freeze Protection of Pipes
- Freeze Protection of Fire Protection System Piping
- Fluid Flow and Viscosity Maintenance

Self-Regulating Low Temperature Heating Cable – SRL

Heating Cable System Design

1. Calculate Heat Loss

Using the Chromalox Design Guide (PJ 304) for Heat Tracing, calculate the heat loss of the system. To calculate the heat loss (Watts) you will need to know pipe diameter, insulation type and thickness, minimum ambient temperature and the pipe maintenance temperature.

2. Select Cable Rating

After calculating the heat loss in the pipe and adjusting for any application deviations, you may determine which cable rating to choose. Using the SRL Thermal Output Ratings graph, select the lowest cable rating that will provide the pipe maintenance temperature. Adjust the cable output for line voltage if necessary. See figures from output wattage at alternative voltages table on page 5.

Thermal Output Ratings On Insulated Metal Pipe

SRL – Self-Regulating Low Temperature Heating Cable

3. Determine Total Cable Length

In addition to the system piping, in-line equipment such as valves, flanges and pipe supports require additional heat tracing to maintain the system operating temperatures.

Total feet of traced pipe + Cable allowance for components = Total cable length

Component Cable Allowances

Component	Cable Allowance (Ft.)		# of Components		Total Additional Cable
Flange Pair	1.5	x		=	
Pipe Support	2.0	x		=	
Butterfly Valve	2.5	x		=	
Ball Valve	2.7	x		=	
Globe Valve	4.0	x		=	
Gate Valve	5.0	x		=	

If spiral wrapping or multiple runs of cable are being used, adjust the allowance by multiplying by the wrapping factor or the number of runs being used on the pipe.

Guidelines for tracing tanks and vessels are also given in the Chromalox Design Guide (PJ304).

4. Determine Circuits/Circuit Protection

Circuit protection depends on the breaker size being used and the start-up temperature. The National Electric Code (NEC 1999) requires the use of ground fault protection breakers for heating cable. The following chart shows the maximum circuit length for a given breaker rating. To determine the number of circuits required for each pipe, divide the total cable (circuit) length found in Step 3 by the maximum circuit length found in the chart. Round up to the next higher number.

$$\text{Number of Circuits} = \frac{\text{Heater Length}}{\text{Maximum Circuit Length}}$$

Maximum Circuit Length (Ft.) by Start-up Temperature (°F) and Breaker Size (Amps)

	50°F Start-Up (Ft.)							0°F Start-Up (Ft.)							-20°F Start-Up (Ft.)						
Cable Rating	Circuit Breaker	10 A	15 A	20 A	25 A	30 A	40 A	Circuit Breaker	10 A	15 A	20 A	25 A	30 A	40 A	Circuit Breaker	10 A	15 A	20 A	25 A	30 A	40 A

SRL10-2C		100	160	210	260	315	360		80	125	170	210	255	340		75	120	160	195	240	320

*Thermal magnetic circuit breakers are recommended since magnetic circuit breakers could “nuisance trip” at low temperature.

NR = Not Required. Maximum circuit length has been reached in a smaller breaker size.

SRL – Self-Regulating Low Temperature Heating Cable

Model Numbers

Accessories

Chromalox has a complete line of accessories specifically designed for use with SRL cable. Use only Chromalox accessories to ensure the performance of the heat trace system.

	Model	Description
Thermostat	RTAS	DL Series air-sensing thermostat with Microswitch® for local control of circuit.
	RTBC	DL Series pipewall-sensing thermostat with Microswitch® for local control of circuit.
Power Connection	RTPC	DL Series power connection set kit.
	RTST	DL Series splice and tee set kit.
	RTES	DL Series end seal kit.
Pipe Straps	PS-1, PS-3, PS-10	Pipe straps to affix thermostat and power connection splice kits to pipes.
Fiberglass Tape	FT-2	Tape to affix cable to pipe, 66' x 1/2" roll, install on 12" centers.
Aluminum Tape	AT-1	Tape to aid heat transfer, 180 foot roll. Apply over cable along entire length of circuit.
Caution Labels	CL-1	"Electrical Heat Tracing" caution labels, 5 per package. Install every 10 feet.
Control Panels		Contact your Chromalox representative for Control Panel information.

Note - For PCN's, refer to the DL Series connection system accessories product data sheet.
