

# Baumann™ 24000CVF Carbon & 24000SVF Stainless Steel Flanged Control Valves

The Baumann 24000CVF and 24000SVF line of control valves can be utilized for the control of pressure, temperature, level, and flow. These valves are available with ASME CL150 RF, CL300 RF, or PN 10-40 flanged end connections. The high performance 24000CVF and SVF designs feature low deadband and hysteresis, high flow capacity, superb control characteristics, tight shutoff and advanced packing systems to meet demanding service conditions. Compact and light weight make them ideal for installation in high density piping systems where space is a premium.

## Features

- Compact and light weight design reduces installed piping costs
- ASME and EN end connection options to meet your piping standards
- Full lift post-guided contoured plug allows flushing of debris through valve body
- S31600 austenitic stainless steel trim material is standard; S41600 stainless steel trim is available
- Multiple trim options are available to meet changing process requirements
- Fisher™ FIELDVUE™ digital valve controller available for remote calibration and diagnostics in facilities utilizing the PlantWeb™ architecture
- ENVIRO-SEAL™ packing available for increased packing life and integrity
- NOLEEK bellows bonnet suitable for a wide range of operating temperatures
- Extension bonnets in multiple lengths available for elevated temperature and cryogenic application service

Table 1. Materials of Construction

Key No.	Description	Material
1	Valve Body, Carbon Steel	Cast Carbon Steel (ASME SA216 WCC and EN10213 1.0619 Dual Certified)
	Valve Body, Stainless Steel	ASME SA351 CF3M
2	Seat Ring (For Low Flow Trim, Refer to tables 2 & 3)	Standard ASTM A276 S31600/ S31603 Dual Certified / Optional ASTM A582 S41600 Condition T
4	Plug (Metal Seat) Cv < 3.3	ASME SA479 S21800 (standard) / ASTM A582 S41600 Condition T (optional)
	Plug (Metal Seat) Cv > 3.7	ASTM A276 S31600/ S31603(standard) / ASTM A582 S41600 Condition T (optional)
	Plug (Soft Seat)	ASTM A276 S31600/ S31603 with PTFE (Polytetrafluoroethylene) insert
5	Stem	ASTM A276 S31600
8	Bonnet, Carbon Steel (Std)	Cast Carbon Steel (ASME SA216 WCC and EN10213 1.0619 Dual Certified)
	Bonnet, Stainless Steel (Std)	ASME SA351 CF3M
	Bonnet (extended) <sup>(1)</sup>	ASME SA351 CF3M
	Bonnet (NOLEEK) <sup>(1)</sup>	ASME SA351 CF3M & ASTM A479 S31600/S31603, Annealed
8a	Bonnet Bushing <sup>(2)</sup>	ASTM A276 S44004, HT 56-60 HRC
9	Drive Nut (Yoke)	S30400
10	Packing Follower	ASTM A276 S31600/S31603 Dual Certified
11	Stud	ASME SA193 Grade B8, Class 1
12	Nut	ASME SA194 Grade 8
14	V-Ring Packing (standard)	Refer to figure 4, table 4
	Packing (optional)	Refer to figures 5 & 6, tables 5 & 6
27	Locknuts	Stainless Steel (18-8 SST)
49	Body Gasket	Graphite Grade GHR with S31600 Insert
58	Travel Indicator	ASME SA240 S30400

1. Extension bonnets and NOLEEK bellows bonnets are available with 24000SVF stainless steel valves only.  
2. Guide bushing is applicable to 24000CVF carbon steel valve assembly only.

Figure 2. Optional 151 Low Flow Trim Assembly

E1246

## 151 Low Flow Trim Assembly

The PTFE seat surrounds the valve plug (key 4) to eliminate clearance flow typical of lapped-in metal-to-metal close clearance micro trims. Flow is directed over the valve plug and forced through a single V-notch path as the plug moves above the PTFE seat providing precise and predictable control over its entire travel range. When the V-notch moves below the PTFE seat, CLVI primary shutoff is achieved.

A live-loaded metal collar fully retains the PTFE seat. The valve plug (key 4) seats against the metal collar providing CL IV secondary shutoff. In addition, the fluid process pressure combines with the actuator seating force to form a hydraulic seal within the fully retained PTFE seat. Therefore, the higher the process pressure the tighter the shutoff.

## Special ENVIRO-SEAL Packing Note

The ENVIRO-SEAL PTFE packing system is suitable for 100 ppm environmental applications on services up to 51.7 barg (750 psig) and process temperatures ranging from -46 to 232°C (-50 to 450°F).

For non-environmental applications, this packing system offers excellent performance at the same temperature range up to the maximum valve working pressure.

Temperature limits apply to packing arrangements only. Complete valve assembly temperature limits may differ. Refer to appropriate pressure/ temperature ratings.

Reference [Fisher Packing Selection Guidelines for Sliding-Stem Valves, bulletin 59.1:062, D101986X012](#).

**⚠ WARNING**

The Baumann NOLEEK valve bonnet assembly is not intended for use in lethal service applications.

The NOLEEK Bellows Bonnet Assembly is reliable and user-friendly. Typical service life is in excess of 250,000 full cycles under 100 psi pressure. The bonnet adds only approximately 5 inches to the height of a standard valve. Operating temperature range is -195 to 399°C (-320 to 750°F).

ONLY AVAILABLE WITH 24000SVF STAINLESS STEEL VALVES.
