

Description:

The EFDC pushbutton boxes are made of aluminium alloy. They are rectangular shaped and complete with a flat joint cover, which is fixed by hexagonal head screws and two threaded holes for cable entry.

They are available in different configurations with pushbuttons, pilot lights (1" or 1/2"), switches and a potentiometer is installed.

Application:

The EFDC is designed to contain pushbuttons, pilot lights, selector switches, potentiometers combined in several configurations and as command pushbutton.

Note: 1) Maximum lamp voltage and power: 240 V – 5 W.

2) For IIB+H₂ version, letter "-H" to be added after "EFDC" (e.g. EFDC-H).

3) Pushbutton suffix identifies the max. number of 1/2" components (pushbutton and pilot light); other components (potentiometer, switches, ...) may require more than one place.

4) Dimensions can slightly differ due to casting model tolerance.
